EDUCATION

Bachelor of Science in Computing Science

University of Alberta

Edmonton, AB

Expected Graduation: 2027

Relevant Courses: Algorithms | Machine Learning | Software Engineering | Database Management | Computer Organization & Architecture

EXPERIENCE

Full Stack Developer Intern

Jarillo Consulting

Edmonton, AB

Jan 2026 – April 2026

- Accelerated feature delivery by 30% by serving as Scrum Master for a 7-person Agile team, driving sprint planning, client communications, and rigorous PR reviews.
- Reduced deployment failures by 40% by architecting CI/CD pipelines via GitHub Actions and Vercel on Azure VM infrastructure, streamlining the team's release workflow.

AI Software Developer Intern

JuliGerm

Lesotho, South Africa (Remote)

Apr 2025 – Aug 2025

- Reduced system downtime by 30% by designing and maintaining AI-powered backend pipelines on Microsoft Azure to process agricultural and satellite data at scale.
- Cut farmers' manual tracking effort by 40% by building a custom search engine that unified crop health, soil quality, water usage, and weather data into a single decision dashboard.

PROJECTS

Field Notes AI | React Native, Supabase, Azure, SonarQube, Jest

Team Project

April 2026

- Maintained zero critical security vulnerabilities by enforcing strict quality gates via ESLint, CodeQL, and SonarQube for a cross-platform React Native app serving social workers.
- Ensured reliable deployment by architecting a scalable self-hosted Supabase backend and automating APK build pipelines, cutting manual release effort significantly.

Mood Tracker Android App | Java, Android SDK, Firebase, Google Maps SDK

Team Project | Github Repo: github.com/cmpu301-w25/project-kernelcrew

April 2025

- Enabled 100+ users to reflect on emotions more consistently by building an Android mood-tracking app with geotagged pins, custom timestamps, and offline sync capabilities.
- Increased daily log completion rates by 25% during testing by implementing authentication, social following, and push notifications in a 6-member Agile team.

ConsoleTweeter: CLI Social Platform | Python, SQLite, MongoDB

Team Project | Github Repos: [SQLite](#) · [MongoDB](#)

December 2024

- Validated cross-backend correctness on 200+ sample tweets by engineering a CLI social platform with authentication, tweeting, search, and following across SQL and NoSQL backends.
- Improved search precision and user navigation efficiency by 30% by implementing hashtag parsing and contextual user filters.

Sign Language Detector | OpenCV, TensorFlow, Python, Jupyter Notebooks

HackED 2024 | Github Repo: github.com/adityadipakpatel/Sign-Language-Detector

January 2024

- Achieved 90% gesture-to-text translation accuracy by building a real-time sign language detection app using TensorFlow and OpenCV.
- Enabled faster digital communication for Deaf and Mute individuals by reducing recognition latency to under 200ms per gesture through model optimization.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: ReactJS, NodeJS, ExpressJS, Redux, Django, Flask, PyTorch, TensorFlow, scikit-learn

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Microsoft Azure, Amazon Web Services, Google Cloud Platform

Developer Tools: Git/GitHub, Postman, Docker, Android Studio, Linux, Windows
